

On the Subject of Knobs

Needlessly complicated and endlessly needy. Imagine if such expertise were used to make something other than diabolical puzzles.

- The knob can be turned to one of four different positions.
- The knob must be in the correct position when this module's timer hits zero.
- The correct position can be determined by the number of LEDs that are lit in the left and right half of the module.
- Knob positions are relative to the "UP" label, which may be rotated.

LED Configurations

LEDs	Position
0, 3	LEFT
1, 4	LEFT
3, 2	DOWN
4, 3	UP
4, 4	UP
5, 2	RIGHT
5, 3	DOWN
5, 4	RIGHT
