

On the Subject of the Mouse In The Maze

Inside some bombs is a mouse that is remote-controlled via a chip in its spinal cord.

- The mouse is located inside one of the following mazes.
- The mouse can move forward or backward or turn left or right.
- To disarm the module, navigate the mouse to the accepting position and press the circular button with the labyrinth.
- Pressing the button at any other location causes a strike.
- The accepting position is marked with one of four colored spheres. Which one depends on the color of the torus in the middle of the maze, according to the table below.

Maze	Torus color	Sphere color
	green	blue
	blue	white
	white	green
	yellow	yellow

Maze	Torus color	Sphere color
	white	yellow
	green	green
	blue	white
	yellow	blue

Maze	Torus color	Sphere color
	green	blue
	blue	yellow
	white	green
	yellow	white

Maze	Torus color	Sphere color
	yellow	yellow
	blue	green
	green	white
	white	blue

Maze	Torus color	Sphere color
	white	yellow
	green	white
	blue	green
	yellow	blue

Maze	Torus color	Sphere color
