

Appendix Two Factor: Two Factor Identification Reference

Digital displays can be found on sides of the bomb casing showing a serial number.

A rectangular digital display with a black background and a white border. Inside the display, the text "[000000.]" is shown in a white, monospaced font. The text is enclosed in square brackets, and there is a period at the end of the six zeros.

The display shows up to a six digit number for two factor authentication. The number rotates every 60 seconds for security. When the serial number changes, three audio tones will sound.
