

# On the Subject of The Dimma-Digit

And they said you couldn't oversimplify the simple.

For those already familiar with this module.

Last SN digit + batteries										
RJ or DVI present: + # of Letters in SN										
Use the table below to convert your digit:										
From:	0	1	2	3	4	5	6	7	8	9
To:	0	2	1	6	2	0	3	4	4	8
- Port plates										
Batteries * holders > 6: +2, else: - 3										
* Ports										
+ Lit indicators										
Submit the last digit of result										

Like Blind Alley, the solution for all The Digit modules is identical.
