

On the Subject of T-Words

Troublesome terms to tell the trained team-member.

- The module consists of four buttons, each containing a "T-Word" label and a coloured LED.
- Press the coloured LED to cycle alternative fonts.
- Determine which is the relevant column of the table.
- Press the words in the order they appear in the table.
- Pressing the words in the wrong order will cause a strike and reset the labels.

Use if there are more than four batteries and the LED is not red.	Otherwise, use if there is an unlit BOB or FRK or a lit CAR or IND and the LED is not green.	Otherwise, use if there is a serial port and a DVI-D port and the LED is not blue.	Otherwise, use if the serial number does not contain a vowel and the LED is not orange.	Otherwise, use this column.
Tautochronous	Tatterdemalion	Tauromorphous	Tellurometer	Tachygraphy
