

On the Subject of Purgatory

Imagine if you died while disarming a purgatory module, hehe... I'm going to hell for that one.

- The module will consist of five stages in which you must decide who goes to heaven and who goes to hell.
- Pay attention to the color of the LED in the top left corner of the module.
- If the module has to wait until the end of the bomb, the current stage will be the last stage
- If the LED is RED, use Table A.
- If the LED is BLUE, use Table B.
- If the LED is GREEN, use Table C.
- If the LED is YELLOW, do not click anything on the module until every other module is disarmed, and then go to the last list in the manual.
- If the serial number has a vowel, use the left column. Otherwise, use the right column.

Table A	
<ul style="list-style-type: none"><li>• If the bomb has 2 or more batteries, send the person to HELL.</li><li>• Otherwise, if the bomb has more lit indicators than unlit indicators, send the person to HEAVEN.</li><li>• If none of the above apply, send the person to HEAVEN.</li></ul>	<ul style="list-style-type: none"><li>• If the bomb has a lit SIG indicator, send the person to HELL.</li><li>• Otherwise, if the person's name has an even number of letters, send the person to HEAVEN.</li><li>• If none of the above apply, see Table C.</li></ul>
Table B	
<ul style="list-style-type: none"><li>• If the LED is flickering, send the person to HELL but ONLY when every other module has been disarmed.</li><li>• Otherwise, if the bomb has less than 4 batteries, send the person to HEAVEN.</li><li>• If none of the above apply, send the person to HELL.</li></ul>	<ul style="list-style-type: none"><li>• If the bomb has a parallel or serial port, send the person to HELL.</li><li>• Otherwise, if the person's name has an odd number of letters, AND there are more than 2 batteries on the bomb, send the person to HEAVEN.</li><li>• If none of the above apply, add up all the numbers in the serial number and click either HEAVEN OR HELL that many times.</li></ul>

Table C

<ul style="list-style-type: none"> <li>• If there are exactly two lit indicators on the bomb, send the person to <b>HELL</b>.</li> <li>• Otherwise, if the person has five or fewer letters in their name, send the person to <b>HEAVEN</b> but ONLY when the timer has a two in any position.</li> <li>• If none of the above apply, send the person to <b>HELL</b>.</li> </ul>	<ul style="list-style-type: none"> <li>• If there are more than 3 batteries on the bomb, send the person to <b>HELL</b>.</li> <li>• Otherwise, If there are less than 3 batteries on the bomb, send the person to <b>HEAVEN</b>.</li> <li>• If there are exactly 3 batteries on the bomb, send the person to either.</li> </ul>
--	---

If the LED is Yellow:

Use the table below to determine where to send the person.

	No Strikes	1 Strike	2+ Strikes
Parallel port present	+1	-1	-2
> 2 batteries present	-1	-2	+1
SIG indicator	Lit: +1 Unlit: -1	Lit: +1 Unlit: -2	Un/lit: -1
LED flickering	+1	-2	-1

If the result of the number is positive or is equal to 0, send them to **HEAVEN**.  
Otherwise, send them to **HELL**.
