

On the Subject of USA Maze

The United States of America: where easy video games come from.

This module has three displays - a large display that shows your current state*, and two smaller displays that says "USA"** and that shows your destination state. Use the map and the **Abbreviation** table below to find the correct path. Use the shapes on the module to cross boundaries between adjacent states. If you pressed a shape that is not on the border of the state you are currently at, a strike will be recorded.

Black lines represent borders you cannot cross, while white lines represent borders you are allowed to cross. Once you get to your destination state, the module will be solved.

You may have the option to fly to and from certain states based on the day of the week if your state is not on the map. States that can be flown to have a symbol not connected to another state or have its symbol attached to its name. Use the **Day Of Week** table to determine which borders are open on the given day.

*If you cannot see your current movements, a button with the letter "R" will be available to send you back to where you started. You will also be sent back to your starting location on receiving strikes.

**If the top right panel doesn't say USA, you've probably got the wrong manual

Day Of Week Table

	Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
