## On the Subject of Wire Sequences

It's hard to say how this mechanism works. The engineering is pretty impressive, but there must have been an easier way to manage nine wires.

• Within this module there are several panels with wires on them, but only one panel is visible at a time. Switch to the next panel by using the down button and the previous panel by using the up button.

- Do not switch to the next panel until you are sure that you have cut all necessary wires on the current panel.
- Cut the wires as directed by the following table. Wire occurrences are cumulative over all panels within the module.

Red Wire Occurrences		
Wire Occurrence	Cut if connected to:	
First red occurrence	С	
Second red occurrence	В	
Third red occurrence	A	
Fourth red occurrence	A or C	
Fifth red occurrence	В	
Sixth red occurrence	A or C	
Seventh red occurrence	A, B or C	
Eighth red occurrence	A or B	
Ninth red occurrence	В	

Blue Wire Occurrences	
Wire Occurrence	Cut if connected to:
First blue occurrence	В
Second blue occurrence	A or C
Third blue occurrence	В
Fourth blue occurrence	A
Fifth blue occurrence	В
Sixth blue occurrence	BorC
Seventh blue occurrence	С
Eighth blue occurrence	A or C
Ninth blue occurrence	A

Black Wire Occurrences	
Wire Occurrence	Cut if connected to:
First black occurrence	A, B or C
Second black occurrence	A or C
Third black occurrence	В
Fourth black occurrence	A or C
Fifth black occurrence	В
Sixth black occurrence	BorC
Seventh black occurrence	A or B
Eighth black occurrence	С
Ninth black occurrence	С
