# On the Subject of Module Homework

Yess! Homework! School is so easy that this'll be over in no ti- Wait... What subject is this?

- This module consists of a piece of paper with 4 answer buttons.
- None of the actual answers are on these buttons. They must be found below in the manual.
- The subject can be any of the modules viewed down below (both modded and vanilla).
- Find the subject asked for in the question and give the correct answer.
- Follow the list below to find the correct order of buttons (Section C).
- The answer itself isn't shown in the list below. You have to answer it yourself.
- If the answer is correct, the module will be disarmed.
- Keep in mind though: A single class lasts for 1 minute. You start the class by pressing on the pencil.
- Answering before class gives you a strike and resets the class.
- Not answering before the end of class will hand a strike too.

Section C: Keep Learning And Nobody Explodes homework list

- First: Take the first digit of the serial number as the base number.
- If the serial number contains a letter that is also in the word "School", add 3 to the base number.
- If any of the indicators contain a letter in the word "Student", add 2.
- If a parallel port is present on the bomb, add 2.
- If either the indicator "FRK" or "NSA" is present, lit or unlit, add 2.
- If there is a vowel in the serial number, add 5 (also counts for the O in the "School" rule).
- If there is more than 1 D battery, add 2.
- But, if the indicator "BOB" is present and is lit, ignore all the rules. After all, BOB is still in elementary school.
