# On the Subject of Swindling The Swan

Every 108 ~~minutes~~ seconds, the button must be pushed...

- Every 108 seconds, the "Execute" button must be pushed. After 40 seconds are left in the timer, you must enter **4, 8, 15, 16, 23, 42,** followed by pushing "Execute".
- Entering the correct button sequence will cause a system reset.
- Some time after 40% of the bomb's modules are solved (or when the bomb timer has three minutes remaining), alternative input commands will appear after a system reset.
- If the bomb timer reaches three minutes, the timer may reset to 108 mid-cycle. This DOES NOT constitute a system reset.
- Once the alternative input commands have appeared, you will have 108 seconds enter the correct disarm code, based on the number of resets below.

Number of Resets	Disarm Code	Number of Resets	Disarm Code
0	SWAN	13	DARMA
1	HATCH	14	DHARMA
2	HATCH	15	HTCH
3	SWN	16	DHARMA
4	SWAN	17	SWAN
5	HATCH	18	HATCH
6	SWAN	19	HTCH
7	DARMA	20	HATCH
8	DHARMA	21	HTCH
9	SWN	22	HTCH
10	DHARMA	23	SWAN
11	HATCH	24	DHARMA
12	SWAN	25+	77
