If you have exactly 2 DVI-D, 1 RJ45 and a lit CLR, change every field into another color of choice.

Otherwise

Take the first rule that applies in the list:

- If batteries + indicators + ports = number in parentheses, use that.
- Otherwise, use the name that shares the most letters with all the unique letters in all the indicators.
- If there's a tie, use protanomaly.

Protanomaly (9) {2×A, L, M, N, 2×O, P, R, T, Y}	Deuteranomaly (11) {A, D, 2×E, L, M, N, O, R, T, U, Y}	Tritanopia (8) {2×A, 2×I, N, O, P, R, 2×T}
